Election/Restrictions

Applicant's election of Species A in the reply filed on February 21, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 33, 37, 45 and 70-74 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on February 21, 2006.

Claim Objections

Claims 16 and 52 are objected to because of the following informalities: in claim 16, a comma or alike should be inserted between the words "housing" and "the"; and in claim 52, line 2, the word "chaped" should be substituted by the word ---shaped---. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19, 20, 22-25, 27, 34-36, 38, 40, 44, 46-50 and 52 are rejected under 35 U.S.C. 102(b) as being anticipated by Hochshuler et al US Patent 6,080,193.

Hochshuler et al discloses a spinal implant (10) comprising an upper plate (84), a lower plate (85) positioned opposite the upper plate such that a gap having a maximum width between

the upper and lower plates (see Figs. 13 and 15). A device (tool, not shown) that urge the upper and lower plates apart, and wherein the upper plate and the lower plate are urged together and the gap between the plates narrows (see Figs. 12 and 14).

Regarding claims 23 and 24, see elements 87 sliding toward each other.

Regarding claim 25, the load has been interpreted as the force exerted to element 87 by the rotation of element 80.

Regarding claim 27, see openings 90.

Regarding claim 36, see fig. 12.

Allowable Subject Matter

Claims 1-18, 21, and 53-69 are allowed.

Claims 26, 28-32, 39, 41-43 and 51 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
